**C-13**

I received this draft test method in early April 2008. The draft standard was reviewed by me during April and May. My recommended changes were sent to the SP chairman in early May for comments. After numerous attempts (without success) to get the SP chairman to complete his review or provide me feed back, the TMC engineer and I will send the revised test method to the SP for comments during December 2008.

**D 5760**

The standard was reviewed and recommended changes were sent to the SP chairman in early June. The standard was balloted within SC B during September-October 2008. The SP chairman found an error in the ballot and the standard was successfully re-balloted in SC B during October-November 2008. D5760 will be on the first 2009 D02 ballot.

**Sequence VID**

I received the draft test method during late November 2008, and I have begun my review. I expect to complete my review sometime late December 2008 or early January 2009.

Respectfully submitted,  
*E. A. Hap Thompson*
