MINUTES:

Work Product -

Andy Ritchie - Word doc (can ASTM be facilitators). Live in TMC site. Include what Chairs or NOT supposed to do.

Bob Campbell - Make a specific focus for this group to lay out what a Chair IS NOT supposed to do. In ASTM view, the SPs are just informal Task Forces

Rich - doc should be accessed from TMC website. Perhaps a flow/structure matching the LTMS document. Ensure we very specifically address what the Chair IS NOT responsible for.

Bill - follow the layout/flow of an ASTM procedure. Good agreement on this path.

Pat Lang - Word doc makes sense. Does like format of Excel spreadsheet. Have a folder with full Word doc AND Excel as a "quick guide."

Rich - TGC is focal point for all SP Chairs. Should be under TGC governance.

Jason Bowden - who will be in "control" of the doc long term? This probably won't be on official ASTM doc. Might be helpful to have a current list of who all SP Chairs are.

Pat - the SP list already exists.

CEC website - they include link to whoever a Chair is at that point.

Pat - TGC has an effort on the side to review voting guidelines

Bill - leader of that task force. Just haven't started yet.

Joe Franklin - Extracts from D02 (facts for Members?) to use as a baseline for voting rules

Andy Ritchie - 1st Thursday of each month, 90 min. for meeting frequency.
