MEMORANDUM: 09-026

DATE: May 6, 2009

TO: HTCBT Surveillance Panel

FROM: Michael T. Kasimirsky

SUBJECT: Reference Oil 44-1 Initial Test Targets

On May 5, 2009, the HTCBT Surveillance Panel approved a motion to introduce Reference Oil 44-1 into the calibration system using test targets based upon nine data points. The initial targets are shown in Table 1, below:

Table 1: Reference Oil 44-1 Initial Test Targets (N=9)			
Parameter	Mean	Standard Deviation	Acceptance Range
Copper Concentration	4.8820	0.1061	107.1 to 162.4
Lead Concentration	41.3	10.3	21.1 to 61.5

The individual test results used in generation of these test targets are shown in Table 2. The individual test results, initial test target acceptance range, and the test target acceptance range for Reference Oil 44 for *Copper Concentration* and *Lead Concentration* are plotted in Figures 1 and 2, respectively.

These test targets will be updated and frozen when 30 data points are available on this reference oil.

These targets are effective on May 5, 2009.
