

LDEOC/EOEC SURVEILLANCE PANEL

A LDEOC conference call was held on 10-27-14, at 1 pm central standard time. The following members were on the call:

Mike Kasimirsky – TMC
Mike Lopez - Intertek
Jill Martinez – Chevron
Michelle Holzer - SwRI
Mike Birke – SwRI
Becky Grinfield – SwRI
Jason Bowden – OHT
Rick Hartman - Lubrizol
Geifu Wu – Ashland
Angelina Chan – Afton

The purpose of the teleconference was to discuss the SAE J2643 standard, and how recent changes in the document affect D7216. The AEM-1 recipe was recently modified, and the surveillance panel was not informed. The cure rate was reduced from 10 minutes to 5 minutes. Since ASTM D7216 procedure references the SAE J2643 procedure for the formulations of this material, the panel discussed what course of action to take. The two options are to keep the old recipe and notate the change in the method, or adopt the new material. Mike Birke will call the class panel chair, Tom Smith, to inform him of this development and get his opinion on how this situation should be handled. He will also call Angela Willis at GM for the reasoning behind the decision to change the cure rate. Another conference call will be held later in the week to finalize a plan of action. The meeting adjourned at 9:20

The meeting adjourned at 9:07 central time.
