REPORT PACKET REVISION NOTICE: MTEOS-20080812

VERSION: 20080812

EFFECTIVE DATE: October 1, 2008

DATE: August 28, 2008

TO: D02.B0.07 TEOST Mailing List

FROM: Tom Schofield

An updated MTEOS (D7097) test report packet has been approved by an Email ballot of the D02.B0.07 TEOST Surveillance Panel and has been beta tested by the ASTM Data Communications Committee. The changes include the deletion of some operational parameters and field description changes to the report forms and data dictionary to make the report form and data dictionary descriptions agree, or to standardize the field descriptions. Also, two (of three) comment pages were deleted from the report forms, making the entire report form three pages instead of five.

The revised report packet version 20080812 will replace the current version 20030411 effective October 1, 2008. Version 20080812 report forms (pdf format), data dictionary, repeating fields specifications, summary of changes and flatfile template are available for ftp download from the TMC's website:

http://www.astmtmc.cmu.edu

(Select the blue Report Forms and Data Dictionary button → Bench Tests → MTEOST → beta → current. The folders will be moved to Report Forms and Data Dictionary button → Bench Tests → MTEOST → current on the effective date.)
