REPORT PACKET REVISION NOTICE: COAT- 20170605

VERSION: 20170605

EFFECTIVE DATE: June 9, 2017

DATE: June 6, 2017

TO: Caterpillar Surveillance Panel

FROM: Sean A. Moyer

A new version of the COAT report forms and data dictionary is now available from the TMC Website. This new version contains a critical update adding two new fields to document flow density meter temperature as well as the changes from the 20170515 beta version. As the FDM temperature field changes are needed as soon as possible for test reporting, per surveillance panel direction this new version will be effective June 9, 2017 and the 20170515 version will no longer go into effect on June 15, 2017 as originally scheduled. If you have any concerns please contact me as soon as possible.
