REPORT PACKET REVISION NOTICE: IIIH-20191014  
VERSION: 20191014  
EFFECTIVE DATE: 20191028  
DATE: October 14, 2019  
TO: Sequence III Surveillance Panel  
FROM: Richard E. Grundza

Recently, the Sequence III Surveillance Panel agreed to add the interpolated 70 hour viscosity result to Form 4 of the test report. During beta testing, it was identified that form 5 did not provide for data points which have had over/under range applied and also, some field lengths for OILCODE and FORM fields needed to be increased. Version 20191014, which addresses all the above mentioned items, is available from the TMC Website and is effective October 28, 2019. Please note that the Surveillance Panel has requested a reduced implementation period due to the need for reporting these results for registration purposes.
