

MEMORANDUM: 04-071

DATE: September 24, 2004

TO: Sequence III Surveillance Panel

FROM: Michael T. Kasimirsky *Michael T. Kasimirsky*

SUBJECT: Sequence IIIG/IIIGA Reference Oil 435 Test Target Update

On May 26, 2004, the Sequence III Surveillance Panel approved a motion to revise the test targets on 435 based upon all the data available to date in the LTMS. As part of the motion, the panel also approved a plan to update the targets when 30 and 35 data points on this oil become available. These revised targets, based upon the 31 data points available at this time, are shown in the following table:

Parameter	Mean	Standard Deviation
PVIS	5.1838	0.3096
WPD	3.59	0.58
ACLW	3.4985	0.2342
MRV	N/A*	N/A*

\*MRV results for 435 use the calculated Yi value for PVIS in the MRV control charts

Any applicable severity adjustments were applied to the data prior to target generation. The data used to generate these targets is shown in Tables 1 & 2. Table 1 shows unadjusted data. Table 2 shows severity adjusted data, with the adjusted parameters shown in red. The above test targets; as well as the severity-adjusted data used to generate them; the raw test targets, the initial test targets, and the preliminary targets from the matrix (which were never used in the IIIG LTMS) for reference oil 435 are shown in the following figures. Figure 1 shows the PVIS data in transformed units. Figure 2 shows the PVIS data in original units. Figure 3 shows the WPD data in original units. Figures 4 and 5 show the ACLW data in transformed and original units, respectively.

These targets are effective for all tests completed on or after October 1, 2004.
