### 4.0) Fuel supplier status report

#### 4.1) Fuel Batch Status:

- Fuel expected to last until end of 2025Q1
- Lubrizol has completed the fuel dilution experiment and is waiting for oil samples to be analyzed.

#### 4.2) New Fuel Batch Status:

- 400,000 gallons are being blended
- First fuel analysis showed low sulfur content
  - Sulfur is being added
  - Fuel analysis will be complete by 12/23/2024

- Fuel will be available for shipment when fuel specs meet requirements.

## **5.0) O&H Updates**

### 5.1) Hone Analyzer Update:

- Labs are ready to agree on hone measurement filtering and other settings on analyzer.
- Action Item: Ben Maddock to discuss final settings with labs.

### 5.2) Pistons and Rings:

- TEI received piston rings in early December 2024.
  - Ring quote was sent to labs.
  - TEI received 20 less of the +.250 mm ring sets than expected.
- Pistons from TEI are expected to arrive by April 2025.
  - Piston quote will be provided by TEI upon delivery.

## **6.0) Old Business**

### TMC Data Dictionary Modifications

- TMC's addition of Camshaft Run Number to the data dictionary should be completed by December 20, 2024.
- The changes will take effect January 8, 2025.

## **7.0) New Business**

### VH Test Report Format

- Concern raised by Tim Cushing that some VH tests reports include test part photos and others do not.
- VH procedure does not require reports to include photos.
- After discussion, it was agreed that test customers can require labs to include photos in their test reports.

## **8.0) Meeting Adjourned**

Meeting adjourned at 1:45 pm EST

Next meeting scheduled for January 23, 2025 at 9:00 -10:30 EST
