

MEMORANDUM: 25-014

DATE: June 10, 2025

TO: Sequence VI Surveillance Panel

FROM: Wes Venhoff

SUBJECT: Sequence VIE Reference Oil 544-1 Introduction

During a surveillance panel teleconference held on May 29, 2025, the panel approved the use of TMC reference oil 544-1, utilizing the targets established for TMC reference oil 544. The data analytics group will be involved to further review the 544-1 data, if needed, after sufficient N-size has been established. The effective date for this change is June 12, 2025.
