Sequence VIII Surveillance Panel Meeting Minutes
Thursday, October 30, 2025
San Antonio, TX at SwRI
10:00 - 11:00 AM CDT

Minutes recorded by Patrick Lang
Direct any comments or corrections to: patrick.lang@swri.org

The attendance list can be found as Attachment #1.

There was no membership changes brought to the attention of the panel.

Agenda:

The agenda can be found as Attachment #2.

Meeting Minutes:

No corrections or changes were received for the June 10, 2026, minutes. The minutes were approved as written with no objections.

Fuel Supplier Report:

No issues to report on the fuel. There are currently 11,000 gallons of the “green” fuel in stock at Haltermann.

Parts Supply:

Pat went over the parts supply and noted that we have 585 sets of 03-22 bearings, and the rest of the parts are in good supply.

TMC Report:

Wes Venhoff presented the most recent LTMS charts. There are two calibrated test labs with two stands at each lab. He showed the TBWL and SVIS are in control and noted that there is only a single reference oil 1009-1, and TMC has plenty of this oil remaining with an estimated life of 20 years at the current consumption rate.

No issues reported with the new LTMS system that has been in place for about a year.

New Business:

Adrian Alfonso brought to the attention of the panel that the current Sierra flow meter that is used to measure fresh air flow into the rocker cover has been superseded. As a result, we will be needing to get the new part number vetted out and approved by the panel. Adrian will be providing the panel with additional details on the replacement meter in the future.

Adjournment:

The meeting was adjourned at approximately 10:30 AM CDT.

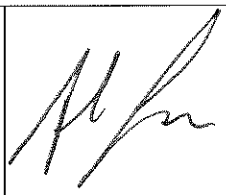

Next Meeting:

The next meeting will be scheduled as needed.
