

## **OSCT Surveillance Panel Meeting Minutes**

**From Teleconference Conducted on 7/8/08**

**Don Bell (OSCT Chairperson)**

**7/8/08**

### **Attendees:**

**Mike Kasimirsky (TMC)  
Thelma Marougy (Eaton)  
Don Bell (Afton)  
Bruce McGlone (ArvinMeritor)  
Michelle Holzer for Becky Grinfield (SWRI)  
Diane Misich (Lz)  
Jennifer Keitter (Lz)**

### **Minutes:**

**We reviewed the recent reference seal data from the two test labs that is available on the TMC website for the new Fluoroelastomer batch, FL373, consisting of 200 slabs. Inspection of the FL373 data relative to Shewhart severity limits shows that shore hardness, % volume change, and % elongation for FL373 fall within the current Fluoroelastomer acceptance bands and very close to typical using TMC reference oils 160-1 and 161-1.**

**Motion by J. Gropp and seconded by M. Kasimirsky: Effective 7/8/08, approve Fluoroelastomer batch FL373 for reference and candidate oil tests since data from both labs are within acceptance bands. Motion approved (6 approved/0 abstentions/0 opposed).**

**TEI will distribute FL373 to test labs for candidate testing as they are ordered at the labs discretion. TEI will re-order a new lot of Fluoroelastomer when their inventory of FL373 drops to 100 slabs or less.**
