MEMORANDUM: 17-002
DATE: February 22, 2017
TO: Industry at Large
FROM: Frank Farber
SUBJECT: Service Fluid 105 Replacement Oil Pilot Blend Availability

Reference Oil 1006/ Service Fluid 105 currently used in Sequence IVA, VG, VIII and elastomer testing cannot be re-blended due to base oil and component obsolescence. A task force has been formed under Subcommittee B to develop a suitable replacement. With help from the current supplier, preliminary testing has identified a suitable replacement formulation. Before a large blend is obtained a pilot blend has been made and is available for additional testing. This fluid has been designated 'SFPILOT' by the TMC and can be obtained by contacting Amanda Darcy at 412-365-1022 or ahd@astmtmc.cmu.edu.
