Brian Foecking, Vanessa DeCapite, Jonathon Bolaney
Jim Gutzwiller
Michael Rainey
Craig Springer, Bobby Trevino, Frank Lopez
Lucio Dominguez, Eduardo Rogriguez, Jesse Rodriguez, Addison Schweitzer

Approval of previous meeting minutes. The minutes for the 11/29/2018 teleconference were approved unanimously and without comment.

Rating Manual Review. Status of Rating Manual update was discussed. ASTM is working on developing the mailing list for this update and that work is ongoing.

Combining Manuals 20 & 21. No action on this item. Bob Campbell will take on this item.

LED Lighting. Discussed a plan to generate comparison data between fluorescent and LED lighting at the workshop. This data will be sent to the appropriate Surveillance Panels for approval of the new lighting requirements.

Workshop/LRI conflict. The group was made aware of the workshop being in conflict with LRI. Raters will be accommodated as needed for travel to LRI.

Workshop Parts. Parts for the Light Duty Workshop were discussed. The same layout from 2018 will be used, with the exception of replacing the IIIG parts with IIH & GMOD parts.

Rater Training. Briefly discussed, but no plans were developed. One suggestion was to require, and verify, that any new attendee has read Manual 20 before being permitted to attend. No resolution was reached, but all agreed that something needs to be done prior to the next Heavy Duty Workshop.

Precision Estimates for Small N-sizes. Jeff laid out a plan for further work on this issue.

The next meeting will be after the 2019 Light Duty Rating Workshop, in late April.
