May 13, 2019

To Participants of the ASTM International Light Duty Rating Workshop:

The ASTM International Light Duty Rating Workshop was held on May 6-10, 2019, in San Antonio, TX. Enclosed are the minutes for the workshop and a copy of all of the data generated.

We would like to take this opportunity to thank you for your participation in this workshop. It is the full participation of the entire rating community that allows the rating methods of Manuals 20 and 21 to be the vital industry tools that they are. The input of each and every rater is a valued component of that tool. Any feedback on improving the workshop is welcome.

Sincerely,

A handwritten signature in cursive ink that reads "Michael T. Kasimirsky".

Michael T. Kasimirsky  
Workshop Coordinator

## **Notes on the Data**

Following is the data produced during the May 6-10, 2019, ASTM International Light Duty Rating Workshop.

Some of the evaluation techniques are destructive and, therefore, do not easily allow repeated measurement (measurable sludge deposits, ring sticking, carbon probing, and parts wiping for example). Every effort is made to limit the destructive impact of repeated measurement of these deposits but repeatability and reproducibility cannot help but be adversely affected. This must be a consideration when reviewing data from deposits of this type.

The statistics presented include the data from all parts and all participants. It is important to have some knowledge of the raters involved when comparing results.

In the rating data, rating results noted in **green** are values closest to the target mean for that part or location. Rating results noted in **blue** are values that are furthest from the target mean for that part or location, but still within a range of plus or minus two standard deviations. Rating results noted in **red** are values that are furthest from the target mean for that part or location, which have exceeded a range of plus or minus two standard deviations. Rating results noted in **red strikethrough** are values that are furthest from the target mean for that part or location, which are also considered “outlier observations” based upon a 99.8% significance level, as defined by ASTM Standard Practice E178 **Standard Practice for Dealing With Outlying Observations**. No screening was done to the target data.

ASTM International strives to make this data useful to as broad a range of industry consumers as possible, however it is primarily intended to provide guidance to workshop participants. ASTM International endorses its use for no other purpose.

# Light Duty Rating Workshop

May 6-10, 2019

San Antonio, Texas

---

## Monday, May 6, 2019

The workshop began at 1:00pm with 12 raters in attendance (see sign-in sheet) for the Session A. Jack Kobrinetz gave some opening remarks on the format of the workshop. Special thanks were given to Lucio Dominguez of Intertek Automotive Research for gathering the parts used at the workshop.

The format and room layouts of the workshop were reviewed, along with parts assignments and computer access instructions. Raters were also asked to confirm they received the correct serial-numbered Rust/Varnish/Lacquer Rating Scale and Sludge Depth Scale in their workshop materials.

For 2019, a group of raters who achieved "non-yellow" color codes at the 2018 Light Duty Rating Workshop were identified. This group of raters was invited to Session A of the Light Duty Rating Workshop, which was used to set the rating targets for all parts in both sessions. Of the 15 raters identified as possible "target raters," 12 raters were in attendance in Session A.

The Minimum Standard Deviation that was implemented at past workshops for all analyses of individual rating was again used for this workshop. For all rated locations in this workshop, a minimum standard deviation of 0.10 merits was implemented for the calculations on those ratings. Any rated location that results in a standard deviation smaller than 0.10 merits will have the minimum standard deviation used for all calculations.

LED sludge rating lights were again made available for review and comparison to the current fluorescent lighting used for sludge rating. All sludge ratings reported for this workshop were made using fluorescent lighting.

At 1:25pm, the group began rating the workshop parts.

At 2:40pm, the group reviewed a "composite piston," which was based upon various locations of several pistons, as agreed upon by the target rater group. This data was not retained and is not included in the workshop report.

At 3:10pm, the preliminary data review ended and the group returned to rating.

At 5:30pm, the group adjourned for the day.

## Tuesday, May 7, 2019

Rating of the workshop parts by the Session A raters continued all day, with a break for lunch at 11:45am. The room was opened at 5:00am and closed at 5:00pm for the day.

## Wednesday, May 8, 2019

The room was opened for rating at 6:00am and the Session A group finished rating the workshop parts.

At 8:10am, Session B of the workshop began with 16 raters in attendance (see sign-in sheet). Jack Kobrinetz gave some opening remarks on the format of the workshop, along with covering some background information regarding rating methods in general, along with specifics relating to the workshop itself.

# Light Duty Rating Workshop

May 6-10, 2019

San Antonio, Texas

---

Special thanks were given to Lucio Dominguez of Intertek Automotive Research for his help in gathering the parts used at the workshop.

The format and room layouts of the workshop were reviewed, along with parts assignments and computer access instructions. Raters were also asked to confirm they received the correct serial-numbered Rust/Varnish/Lacquer Rating Scale and Sludge Depth Scale in their workshop materials. The changes to the workshop format for 2019 that were outlined at the start of Session A were also reviewed.

At 8:45am, the Session B raters began rating the workshop parts.

At 10:00am, the Session A raters began their final data review.

At 11:15am, the Session A raters concluded their data review.

At 11:45am both groups adjourned for lunch.

At 12:15pm, the Session B raters resumed rating the workshop parts, while the Session A raters, who were not remaining at the workshop to provide training, were finished with the workshop. Rating continued until 6:00pm, with some raters receiving additional training, as the need was identified by the workshop data.

## **Thursday, May 9, 2019**

Rating of the workshop parts by the Session B raters continued all day, with a break for lunch at 11:45am. The room was opened at 5:30am and closed at 6:10pm for the day, with some raters receiving additional training, as the need was identified by the workshop data.

## **Friday, May 10, 2019**

Rating of the workshop parts by the Session B raters was completed by 10:10am and the group began the final data review of the workshop parts. At 11:40am, the group completed the data review and then took a short break. At 12:00pm, the workshop adjourned.

## **Discussions**

### **Undercrown Rating**

Undercrown ratings were not performed at this workshop. Undercrown rating requires removal of the pistons from the rating stands, along with significant handling of the pistons to perform the rating. This process can dislodge carbon deposits from other areas of the piston, which will change the ratings of those areas. In addition, some of the piston types at the workshop have a coated undercrown area, which is extremely difficult to rate. It was decided that the value of the undercrown data obtained was not worth the risk to the other results generated in the workshop.

# Light Duty Rating Workshop

May 6-10, 2019

San Antonio, Texas

---

## **Use of LED Lighting in Rating**

The possible use of LED lighting for rating applications was evaluated at this workshop. Due to Federal regulations, fluorescent lighting is on its way out. To evaluate the use of LED lighting in rating, a "round bulb" rating light (used in IIIH and GMOD piston rating) and a "two bulb" rating light (used in Sequence VH piston skirt rating) were converted to LED using commercially available LED conversion kits. These two LED fixtures were set up in a pair of rating booths, along with a fluorescent rating light of the same type, so that several pistons could be rated using both types of lighting.

The target raters from the A Session were asked to rate a single IIIH and GMOD piston, along with a set of eight Sequence VH pistons, using both light sources, with those ratings to be used for comparison between the two light sources.

The data generated using LED lighting will not be used for any color code calculations at this workshop, and will be published separate from the workshop data, to avoid confusion.

## **Future Workshops**

The next Heavy Duty Rating Workshop will be held on September 30, 2019 to October 4, 2019, at this same location.

The next Light Duty Rating Workshop will be held in Spring 2020, with the exact dates and location to be determined.

## Welcome to the Light Duty Rating Workshop

- Please sign in and pick up your rating scales packet.
- Rating Worksheets are at the front of the room.

## Light Duty Rating Workshop

May 2019

## Volunteers

- Thank you to Lucio Dominguez, and the entire Intertek Staff, for their support and for providing parts for the workshop.

## Rating Workshop Server Info

- To access the workshop server, access the local wireless network called “[workshop2019](#)”
- The wireless network password is “[calibration](#)”
- Workshop Web Address: <http://192.168.1.108/>
- Enter your *username* (printed in **red** on the summary page in your packet) in the “password” field on the entry screen. [Leave “TMC” in the other field.]
- If individual ratings do not auto-calculate, **stop and get help before entering additional data!**

## New Rating Scales

- New Rust/Lacquer/Varnish scale included.
- New Sludge Rating Photo scale included.
- Please verify the serial number of both scales in your packet against the numbers listed on the summary page in your packet.
- *Rating Worksheets and a copy of the Room Layout are not included in the packet, but are available on the table at the back of the room.*

## Rating Targets for 2019

- You must rate at least all your assigned parts, and you are encouraged to rate as many parts as possible.

## Light Duty Rating Workshop Data Entry Network

<http://192.168.1.108/>

## Before We Start

- Go into rating room and wipe down pistons
- Point out any pistons that have chipped or pealing carbon
- Someone check for “measurable” sludge, note areas that are measurable and inform John, also list those areas and display.

## “Calibration”

- One composite piston and 2 VH 50% piston skirts will be rated as a calibration exercise
- We will briefly look at data to see where we all stand
- We will discuss any outliers
- We will then be free to rate our allotment of parts

## Welcome to the Light Duty Rating Workshop

- Please sign in and pick up your rating scales packet.
- Rating Worksheets are at the front of the room.

## Light Duty Rating Workshop

May 2019

## Volunteers

- Thank you to Lucio Dominguez, and the Intertek Staff, for their support and for providing parts for the workshop.

## Rating Workshop Server Info

- To access the workshop server, access the local wireless network called “[workshop2019](#)”
- The wireless network password is “[calibration](#)”
- Workshop Web Address: <http://192.168.1.108/>
- Enter your *username* (printed in red on the summary page in your packet) in the “password” field on the entry screen. [Leave “TMC” in the other field.]
- If individual ratings do not auto-calculate, **stop and get help before entering additional data!**

## New Rating Scales

- New Rust/Lacquer/Varnish scale included.
- New Sludge Rating Photo scale included.
- Please verify the serial number of both scales in your packet against the numbers listed on the summary page in your packet.
- *Rating Worksheets and a copy of the Room Layout are not included in the packet, but are available on the table at the front of the room.*

## Rating Manuals

ASTM Headquarters supplies:

- TMC Manual 20 – Deposits
- TMC Manual 21 – Distress
  - Scales included

Go to : [WWW.ASTM.ORG](http://WWW.ASTM.ORG)

# Rating Manuals 20 & 21

The screenshot shows the ASTM International website with the URL <https://www.astm.org/Products-and-Services/Standards-and-Publications/ASTM-Deposit-Rating-Manual-20.html>. The page title is "ASTM Deposit Rating Manual 20 (Formerly CRC Manual 20)". The page includes a sidebar with links to various standards and publications categories like All Standards and Publications, Standards Products, Symposia Papers & STPs, Manuscripts, Monographs, & Data Series, Journals, Reading Room, Authors, Book of Standards, Reading Room, Product Alerts, Catalogs, Enterprise Solutions, Proficiency Testing, Training Courses, Certification & Declaration, Ceramic & Concrete, Reference Lab, and more. The main content area displays the manual's details: "Revised: 2009", "Format: Print Version", "Pages: 767", and "Price: \$767.00". A yellow "ADD TO CART" button is visible. Below the price, there is a link to "ASTM License Agreement" and a "RECORD OF REVISION" section. A note states: "The TMC Deposit Rating Manual is a resource for understanding the method, scales, definitions, and rating aids required for the evaluation of deposits on applicable hardware." It also lists the included sections: Definitions, Rating Environment, Rating Procedure, Sludge, Varnish, Rust, Carbon, and Induction/Combustion System. The FMC logo is at the bottom right.

# Workshop Format

- Light Duty Piston Deposits
  - Three “Letter Sets” of Pistons
    - Three IIIH Pistons
    - Three GMOD Pistons
- Sequence V Varnish
  - Four Sequence VH piston sets (8 pistons per set)
  - Right & Left Rocker Cover Baffle
- Engine Sludge (Seq. V)
  - Right & Left Rocker Cover
  - Right & Left Rocker Cover Baffle

## Workshop Format (Continued)

- Timing Chain Cover
- Oil Pan & Oil Pan Baffle
- Right & Left Valve Deck
- Induction & Combustion
  - Piston Tops (8)
  - Intake Valves (two sets of 8 valves)
- Sludge & Debris
  - Seq. V Oil Screen
- Data Review & Discussion

## Parts Assignments

- Two Sets of “Lettered” parts (A, B, C)
  - Six Sequence IIH Pistons
  - Six GMOD Pistons
  - **Do not remove the pistons from the stands; undercrown ratings are not permitted for any IIH or GMOD piston.**
- Three Sets of Sequence VH Pistons (8 pistons)
  - **Rate top 50% of skirt, Thrust side only**

## Parts Assignments (cont.)

- Parts assignments are the minimum required.
- Additional ratings are always advantageous.
- You're always free, and encouraged, to rate additional parts, if time allows.
- Any sludge deposit ratings of "C" depth or greater will be provided; i.e. no "gauging" of sludge will be required, **or permitted**, at the workshop.

## Parts Modifications

- No modifications to any parts is permitted during the rating workshop.
  - Do not pick at or remove any deposits present on the parts.
  - Removing deposits from a part, to determine the deposit depth (or any other reason), is not permitted.
  - Any part found to be modified in this manner will be removed from the workshop calculations.

## Use of Non-Standard Lighting

- Manual 20 lists specific requirements for the lighting color temperature and illumination level required for rating. (page 15)
- Sufficient lighting for rating is provided at each rating workstation.
- The use of non-standard lighting is not permitted.
  - No flashlights.
  - Ratings generated using non-standard lighting may be removed from the workshop results.

## Merit Rating Scale

- **Merit Rating** – Amount of a distress or deposit in numerical terms on a descending scale from ten (10), which represents absence of distress or deposits. (page 10)
  - Even though the scale is in whole number increments, it is permissible to assign deposit factors in tenths of a number in an effort to accurately describe the intensity level. (page 16)
- **Merit rating values in increments smaller than tenths of a merit are not permitted.**

## Groove Deposit Review

Typical Illustration			
Clearance Fill	100%	>25% <100%	≤25%
Description	HC	MC	LC
Deposit Factor (Demerit)	1.00	0.50	0.25
Deposit Factor (Merit)	0.00	0.50	0.75

HC = heavy carbon  
 MC = medium carbon  
 LC = light carbon

Note that small-bore pistons only use two levels of carbon,  
 Heavy Carbon (HC) & Light Carbon (LC).

## Recording Carbon Levels

- Carbon Merit Ratings are to be recorded using text values, not numbers, in the workshop software.
  - HC      Heavy Carbon (0.00 merits)
  - LC      Light Carbon (0.75 merits)
  - Text values ARE CASE SENSITIVE

## Results Calculations

- Revision of the “Minimum Standard Deviation” for all results calculations.
  - The Rating Surveillance Panel approved a change to the Minimum Standard Deviation used at the workshop.
  - Based upon this decision, 0.10 merits is the smallest standard deviation that will be used in all parts calculations.
  - Values larger than this limit will be used as calculated.

## Workshop Color Codes

- Light Duty Piston Deposits (minimum of 6 parts needed)
  - “Lettered” Piston sets
    - Nine Sequence IIIH Pistons
    - Nine GMOD Pistons
- Sequence V Varnish (minimum of 24 parts needed)
  - Rocker Baffle Varnish
  - Four Sequence VH Piston Sets (8 pistons per set)

## Workshop Color Codes (cont.)

- Sludge (minimum of 6 parts needed)
  - Complete Sequence VH Engine sludge rating
    - Rocker Covers
    - Rocker Cover Baffles
    - Valve Deck Sludge
    - Timing Chain Cover
    - Oil Pan
    - Oil Pan Baffle
- Induction & Combustion (minimum of 6 parts needed)
  - Intake Valves
  - Piston Tops

Light Duty Rating Workshop  
Data Entry Network

<http://192.168.1.108/>

## Calibration

- It is encouraged that you calibrate before rating all assigned parts
- Rate a single part from each section first and see a trainer to see if you are close to the target ratings, if so continue
- If not, you can self adjust or a trainer can go over sections that you “missed” on, to fine tune your rating

# Welcome!

» Light Duty Rating Workshop  
May 6 – 10, 2019  
San Antonio, TX

*Test Monitoring Center*  
<http://easttmc.camra.edu>

A Program of GMK International

## Please Sign In

- ▶ Pick up rating scales packet
- ▶ *Sign attendance sheet each day!*
- ▶ Rating worksheets are available at front table

*Test Monitoring Center*  
<http://easttmc.camra.edu>

A Program of GMK International

## Work Environment

- ▶ Please maintain a ‘library-like’ atmosphere in both the rating and conference rooms.

Test Monitoring Center  
<http://astmcmc.cmu.edu>   
A Program of ASTM International

## Data Entry Server Info

- ▶ WiFi Network:
  - [workshop2019](#)
- ▶ WiFi Network Password:
  - [calibration](#)
- ▶ Web Address:
  - <http://192.168.1.108>

Test Monitoring Center  
<http://astmcmc.cmu.edu>   
A Program of ASTM International

## Data Entry Server Info

► User name:

- Your user name is printed in **red** on your packet summary page
- Enter your **user name** in the **password** field.
- Leave “TMC” in the other field

## ! IMPORTANT !

- All ratings are entered in merits.
- If data entry **does not auto-calculate** then:
  - ***Stop immediately and get help*** or your data will not be saved!

## Help is Available

- ▶ Computer / Network / Equipment Issues
  - TMC Personnel
- ▶ Rating Issues / Questions
  - Rating Advisor
    - Look someone with the red badge lanyard

Test Monitoring Center  
<http://astmtmc.cmu.edu>   
A Program of AT&T Innovations

## Data Entry Screening

- ▶ On submission, the data entry system will flag a part if there is a rating value that needs to be reviewed.

- What to do?

- Seek out a rating advisor

Test Monitoring Center  
<http://astmtmc.cmu.edu>   
A Program of AT&T Innovations

## Flagged Part – Rating Advising

- ▶ Work with the advisor for guidance
- ▶ Re-evaluate the rating in question
- ▶ When ready to re-submit rating,  
*advisor* will request TMC to unlock  
data entry

## Flagged Part – Rating Advising

- ▶ *Only two* re-rates per flagged part is permitted.

## Do's and Don'ts

### ► Do

- Ask **advisors** regarding all parts and ratings issues
- Ask **TMC** regarding network/IT/data entry issues
- Notify **TMC** of any equipment issues
- Be considerate of other raters
  - Quiet in both rooms
  - Do not take excessive time in any single booth

**Test Monitoring Center**  
<http://astmtmc.cmu.edu>

A Program of AT&T Intellectual

## Do's and Don'ts

### ► Don't

- **Pick at deposits or alter parts in any way**
- **Take pistons off of stands**
- **Don't remove piston caps**
- **'Repair' lighting; ask TMC to fix**
- Ask about your color code during rating portion of the workshop
- Ask TMC personnel about rating issues
  - Ask the experts

**Test Monitoring Center**  
<http://astmtmc.cmu.edu>

A Program of AT&T Intellectual

**A Program of ASTM International**
